Application/Control Number: 10/805,692

Art Unit: 2153

1. Claims 34-36 are presented for examination, and claims 1-33 were canceled.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

- 3. Claims 34-36 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as being an abstract idea. Data structure is not tangibly embodied in a manner so as to be executable and it is in fact a non-functional descriptive material that is record on some computer-readable medium (See MPEP 2106.01). Merely claiming non-functional descriptive material that is stored on a computer-readable medium, in a computer, does not make it statutory. Moreover, a collection of fields, per se, is not an actual data structure, instead it is being non-functional descriptive material. Thus, these claims are not tangible.
- 4. Claims 34-36 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The claims are directed to a data structure comprises a collection of fields. And, a collection of fields is not an essential element.
- 5. The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/805,692

Art Unit: 2153

6. Claims 34-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Huth [U.S. Patent No. 6,519,263].

Huth disclosed (e.g., see Figs. 1-2) the invention substantially as claimed. Taking claims 34-36 as exemplary claims, the reference disclosed a system for transmitting data packets from a sender (e.g., a first device, first arrangement) to a receiver (e.g., a second device, second arrangement), said data packets having first and second data fields (e.g., see fields of data packets of Figs. 2, 3F and 5) and these fields represent subject data (e.g., one field of Fig. 3F, cols. 4-6) and a time interval (e.g., another field of Fig. 3F, cols. 4-6).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references are cited in the Form PTO-892 for the applicant's review.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) days from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krisna Lim whose telephone number is 571-272-3956. The examiner can normally be reached on Monday to Wednesday and Friday from 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenton Burgess, can be reached on 571-272-3949. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
